Members of the AOO QA team

When using large pages like 160 cm x 100 cm, the indent does not work as expected. Try:

1. New writer document
- 2a. Format -> Page -> Width: 160 cm
- 2b. Format -> Page -> Height: 100 cm, click "OK"
3. Zoom out to see the full screen. Switch on the ruler if not visible
3. Place the text cursor to the first line and set the alignment to "Center" (Ctrl+E).

Expected output: the text is centered within the page width, cursor should be around 80 cm.

Actual output: the text is centered around 20 cm, definitely not in the center of the page.

When changing the width of the line by dragging the right upper triangle on the ruler, the behavior gets more and more erratic. When setting the right upper triangle to 75 cm, the text becomes left-aligned and the "Indents and Spacing" settings of the paragraph, are negative. It looks like the "Before text" and "After text" simple wrap-around some given limit.

Conclusion: I played around with the max width of the page. Page sizes above 58 cm can not be used because of the described bug. It would be nice to have it fixed, especially for preparing posters, it is the show-stopper.

As a temporary fix - just to avoid confusions - the page width could be limited to 58 cm (now the limit is 300 cm).

[eric.savary@oracle.com](mailto:eric.savary@oracle.com) 2011-05-30 09:39:50 UTC [Comment 1](#) [\[reply\]](#) [\[-\]](#)

Confirmed. Problem starts for me when page width is about 63cm.

Note: frames and graphical objects get the correct position when centered.

[Oliver-Rainer Wittmann](#) 2012-03-02 12:53:50 UTC [Comment 2](#) [\[reply\]](#) [\[-\]](#)

I have reproduced the defect in OOo 3.1 and OOo 3.3

In OOo 2.2 it also does not work - no alignment other than left works.

--> no AOO 3.4 release blocker

[jsc@apache.org](mailto:jsc@apache.org) 2012-03-02 13:02:30 UTC [Comment 3](#) [\[reply\]](#) [\[-\]](#)

no show stopper, change "3.4\_release\_blocker" flag

[Oliver-Rainer Wittmann](#) 2012-06-13 12:16:59 UTC [Comment 4](#) [\[reply\]](#) [\[-\]](#)

getting rid of value "enhancement" for field "severity".

For enhancement the field "issue type" shall be used.
